PROJECTS

ChatEase (Real time chatting WebApp)

📍 Delhi, India

Project Link: https://github.com/bansalankit01/ChatEase_Chattering-App

Oct 2023 - Dec 2023

- Developed a real-time chat application to facilitate seamless communication between users,leveraging the MERN (MongoDB, Express.js, React.js, Node.js) stack.
- Led end-to-end development, creating RESTful APIs for authentication, implementing WebSocket for real-time chat in React.js, and optimizing MongoDB for efficient message storage.
- Successfully developed a responsive and secure chat application.

Bookshelf - Online (A Online Book Store)

📍 Delhi, India

Project Link: <https://github.com/bansalankit01/bookshelf-online>

Apr 2023 - June 2023

- Led the development of a dynamic online bookstore, focusing on user-friendly design, secure transactions, and efficient inventory management.
- HTML, CSS , JavaScript , PHP and SQL technologies are used.
- As the lead developer for an online bookstore project, I encountered the challenge of creating a robust e-commerce platform that would cater to the diverse needs of book enthusiasts while ensuring a secure and seamless online shopping experience.
- Independently conceived, designed, and coded a dynamic Online Book Store Website.

FreeFlix - Netflix Clone

📍 Delhi, India

Project Link: <https://github.com/bansalankit01/Netflix-clone>

Feb 2023 - Apr 2023

- Developed a responsive front-end clone of the Netflix streaming platform as a personal project to enhance my web development skills and showcase my proficiency in modern front-end technologies.
- HTML, CSS and JavaScript technologies are used.
- Independently conceived, designed, and coded a dynamic Netflix Clone.
